BioEnable offers a Crisis Response Box for various on-field scenarios wherein a crisis response management system is a must during panic situations like at railway stations, bus stops, and other publicly accessible places.

The Crisis Response Box is an all-in-one solution to assist citizens and public entities in crisis prevention planning at city level. The Crisis Response Box is an invaluable resource if a critical incident ever arises at a public place. It offers all the necessary features of emergency response plan adapted to provide help to citizens and community before an event occurs.

Comprehensive crisis prevention planning includes assembling the box, coordinating with all those who will be involved if a crisis occurs, conducting practice drills and identifying security needs. The box, therefore, is designed to be both a process and a result. It consists of bringing together Citizens, Local Government officials, law enforcement officers and emergency services personnels in the collaborative process required to meet a city’s disaster planning needs. And, it will result in a tangible aid to gaining control of any public place’s critical incident.

Solution

BioEnable Crisis Response Box is an out-of-the-box solution that provides,

- Real-time two way audio and video communication system for Citizen and City Public Officials
- Reduces manual tasks by automatically starting a crisis call by pushing a Single Button.
